

## Loading Example Spectra from Library to Spec List

1. I saved the spectra that I used as examples in the seminars in a library
2. In a zip file on my website, file name spec\_list\_website.zip
3. Download the file which is a library in NIST format and place in the folder where main, replib, Wiley, and other libraries are found for NIST search program
4. Then go to “other search” tab/ID Number/and Search a range of 1-1000
5. Use shift key and left mouse button to select whole list, and “Send To” “Spec List”
6. Now ready to use in structure and spectrum searches
